Reverse Supply Chain Professionals

Many great reverse supply chain initiatives never reach their full potential. The initiatives fall short of stakeholder expectations, return on investment targets, and more importantly, the expectations for customer impact.

Common pitfalls include:

- flawed design or implementation of strategies
- inadequate risk management and mitigation plans
- competing or misaligned initiatives
- inability to facilitate and manage the project

Often the source of these missed opportunities is a lack of experience and an inability to remain focused on the objectives while balancing the ongoing needs of the business.

The opportunity is to leverage proven methods and experience by partnering with experts committed to your success and focused on delivering the benefits of your business objectives.

Advanced Solutions In Logistics (ASIL, Inc.) has a proven methodology to enable your organization to deliver timely results and a knowledge transfer program to develop your team's skills and confidence required to address future opportunities.

Competitive Advantage

By employing ASIL, Inc. professionals, you gain the immediate benefit of experienced and focused partners backed by the power of the MAX Partnering® software suite. We are committed to delivering your objectives in reverse supply chains.

We accelerate your results in the areas of:

- Strategy Development and Execution
- Service Parts Logistics and Reverse Supply Chains
- Operational Program Management
- Outsourcing and Partner Management
- Information Systems Selection and Implementation
- Executive Leadership and Organizational Development

Benefits

- ⊗ Reduced Cost
- ⊗ Improved Cash Cycle Time
- ⊗ Increased Visibility and Control

A proven implementation framework facilitating timely fact based decision making while identifying and mitigating potential risks.

Access to a diverse partner network bringing the unique capabilities your initiative requires wherever you are.

Our experienced professionals utilize the MAX Partnering® software suite to deliver:

- Visibility and mitigation of risk exposure to increase accountability and control.
- Control through an automated performance management engine allowing you to establish performance criteria and tolerance limits that drive visibility, accountability and controls.
- Accountability through the integrated project management engine delivering automated action reminders when items are coming due and overdue.

ASIL Methodology

The **Driving Complex Change®** methodology is a set of interrelated and mutually dependent elements for managing successful change. We believe that by understanding and using this methodology, you will

- Improve quality
- Adopt and implement new practices
- Decrease overall time to implement.

The team of ASIL, Inc. can develop, facilitate and manage the following areas which are sure to make a difference in meeting your goals and objectives:

Value Added Services

Plan: The most critical aspect of any activity is the planning process. This includes involving the key parties affected, as well as understanding the current state and then designing the future state. It must be fiscally responsible and realistic to achieve.

Execute: The plan is only as good as one's ability to execute it successfully. Many times this area is under estimated. Defining and managing the interdependencies is instrumental to ensure a common understanding and clear path to achievement.

Measure: Measuring success enables all involved to comprehend the impact of the activities undertaken. Whether it is a Financial, Customer, or Operational metric, the importance is the knowing that the desired future state is delivering results.

Our Commitment

Our team is committed to you achieving your objectives. We offer flexible, tailored and cost effective solutions that are sure to fit your needs.

Our Company Profile

ASIL, Inc. offers consulting services and software that will increase profits and drive sustainability based on industry leading best practices. ASIL enables companies to solve business problems in the areas of: supply chains, change management, outsourcing, and score carding with closed-loop action resolution with MAX Partnering® software. Each software module is supported by a suite of integrated web based tools to achieve your business objectives, i.e., strategic clarity, increased productivity, cost reduction, SOX compliance, etc. We provide economic and scalable solutions that have instant start-up capabilities and require no IT infrastructure.

Recognized in 2010 Best of Santa Clara Award in the Business Management Consultants category by the U.S. Local Business Association (USLBA) for the third consecutive year.
